

The Best Bits

Think back through the film and decide which you think are the eight key moments: that is, the parts that the film has to have in order to make it what it is. Sketch these parts of the film into the storyboard below and underneath each picture summarise what is happening in the still (picture). After you have finished your storyboard compare it with other people's to see if you have chosen the same moments and discuss where the similarities and differences are and the reasons for them.
